Rick,

When Rich Schwartz and Michael Bogert met with some of the Region X folks last week, Pebble was requested to send EPA a description of our QA/QC protocols for the information contained in our environmental baseline document. Attached is the appendix describing our program. We believe our program sets a very high standard. We would hope that information about the Kvijak and Nushagak watersheds that you are receiving from others has an equally robust QA/QC program.

I will leave it to you to distribute the document to the appropriate people on your team. I would be interested in receiving a list of those to whom a copy is sent.

If, after reviewing this document, people at EPA would like a briefing from us about it, we would be pleased to provide it.

John

John Shively
